Enhanced Dual Ramp VBIS

An extendable dual ramp assault system designed and developed specifically for Counter Terrorist and Hostage Rescue Unit operations. This system can be readily adapted to integrate with an extensive range of vehicle options, examples being super duty pick-ups, chassis cab trucks, Armoured Personnel Carriers and rescue vehicles to provide a simultaneous rapid deployment and intervention capability on two levels.

Key Features and Benefits.

- Designed and manufactured in the UK.
- Lightweight and durable.
- Safety nor performance of the vehicle is compromised.
- A380/747 aircraft assault capability.
- Full height achieved in 10 seconds.
- Folding side handrails on each ramp.
- Universal mounting bars.
- 1m to 5.25m tactical assault ladder.
- Integrated removal system.
- Global technical support and training.
- Bespoke requirements accommodated.

Options

- Ladder gantry.
- Ballistic ramp panels.
- Rear deployment steps.
- Fast rope system.
- Ladder turntable, 360° assault.
- Ballistic protected sniper platform.
- Explosive breaching rig.
- Tactical, IR lighting and camera system.
- Trailer for transportation and storage.
